WILDFIRE CLAIM PREVENTION EDUCATION

Claims originating from wildfires are typically the result of soot/ash/smoke in the environment, rather than actual fire damage. In some cases property owners are required/asked to evacuate areas that are in potential danger.

KNOW YOUR EXPOSURE

If you/ or your tenants are asked/required to evacuate, there are some steps that you should take to secure the property that may or may not be eventually affected.

- Turn off main breaker/power to the house
 - Ensure all windows are closed and secured
 - Close all interior doors to the various rooms
 - Cover or fill any gaps under doors or vents
 - Turn off AC, if applicable, to prevent the contaminants from entering through the system vents
 - Remove or move flammable materials from the exterior perimeter of the property
 - Wet exterior of property with water/hose if there is time
- If evacuation is required, make certain save all expense receipts
